## Baking Helps

Learn to Regulate the Heat of Your Oven

By Mrs. Janet McKemie Hill, Editor of the Boston Cooking School Magazine

There is just one way to make your cakes rise high and keep an even surface. Have your oven moderate at first, until the cake is fully risen; then increase the heat, so as to brown it over quickly. Extreme heat stiffens the dough. If you stiffen the outside of the cake before the rising is complete, you stop the rising process. Then the leavening gas, forming inside, will bulge up the center, where the dough is still soft, and spoil the shape of the cake.

NOTE—Biscuits or other pastries made from stiff dough, that are cut into shapes for the oven, bake in a hot oven. This is because the cut surfaces of the dough do not seal over, but rather leave the pores open, allowing the leavening gas to escape and the heat to penetrate readily. Small ovens cook quickly; therefore they should be made several degrees hotter than a larger oven, and the less the door is opened the better. Do not attempt to bake bread and pastry together. Bread requires prolonged, moderate baking—pastry the reverse.

Have a strong underheat for baking powder preparations, especially pastry.

These are only a few of the many baking helps found in the K C Cook's Book—a copy of which may be secured by sending the colored certificate taken from a 25-cent can of K C Baking Powder to the JAGURS MFG. CO., Chicago.

## \$350,000,000.00

At the close of 1912, The Union Central Life Insurance Company had nearly Three Hundred and Fifty Million Dollars insurance in force; protecting the lives of many of the most prominent in every State in the Union—the kind of men who demand convincing "reasons why" before buying anything of value. When asked their reasons for choosing this company, they invariably reply: "Because we know the Union Central is absolutely safe, and our own experience proves, beyond doubt, that it furnishes us our insurance at a lower net cost than any other company." Remember—thousands of men say this! Make me prove it!
